

BIOVERSITY Pathogen Screening in Food

**Curated Learning course (2 days) for
Microbiologists across the country.**

Training dates: 18th & 19th August 2026

Vimta Labs, Hyderabad, in collaboration with bioMérieux India, invites participation in the second Bioversity training session for 2026 on “Pathogen Screening in Food Samples.”

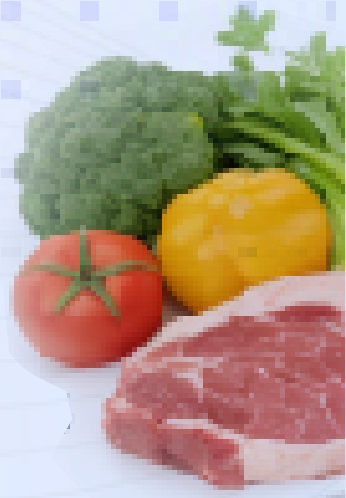

This training session aims to provide in-depth knowledge of food safety microbiology, offering hands-on experience with advanced automated systems for microbiology testing in food.

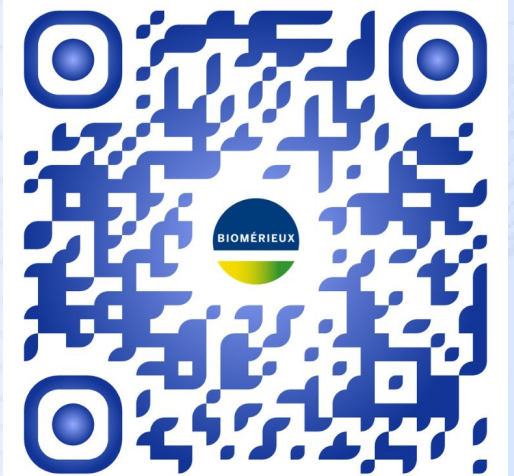

**Accommodation available in Vimta campus at a nominal cost.
Advance bookings for accommodation is essential.**

Topics covered

- Understanding Industry Microorganisms – Farm to Fork
- Understanding International and Indian Regulations for
- Food Testing
- GENE-UP as part of the Food Safety training program
- Understanding Different Food Matrices and Pathogens
- Sample preparation – Dilution & Blending
- Pre Enrichment of samples – Understanding
- media/enrichment process
- Conventional method for Food Pathogen testing
- Media, Principle, Different food matrices and pathogens
- with the testing
- FSSAI norm for pathogen screening
- Understanding VIDAS
- Pre Enriched samples for testing on VIDAS system
- Orientation on Molecular methods for Pathogen Screening
- in Food
- Quiz
