

Partnering in Discovery & Development of Biologics & Peptides

40+
years legacy

600k
sqft lab space

1300+
strong team

90+
successful regulatory audits

30K
customers across 45 countries

Our Services

- Biologics
- Peptides
- Small Molecules
- Complex Drugs
- Medical Devices

Biologics Development & Analytical Services

Leader for a wide range of analytical services for the pharmaceutical, biopharmaceutical and animal health industries.

- Drug substance generation for mAbs, Proteins & Amino acids
- Peptide characterization
- Physical characterization
- Genotoxic impurities (Nitrosamines)
- Method development
- Method validations
- E&L studies
- Stability testing
- Elemental analysis
- In vitro studies
- Dissolution testing
- Microbiology
- Immunogenicity
- Bioassays
- Biosimilarity Studies

Preclinical Research

- General and Genetic toxicology
- Safety pharmacology
- Immunotoxicology
- Development and Reproductive Toxicology (DART) studies
- Comprehensive pharmacological and drug metabolism and pharmacokinetic studies
- Wide gamut of Toxicology services to support agrochemical and medical device industries

Clinical Research

One of India's most reputed and reliable CROs offering end to end clinical development services.

- Equipped with in-house 180 Beds and 10+ LC-MS/MS
- Executed more than 3,500 clinical studies

Our expertise:

- Bioequivalence
- Nutraceutical & Claim studies
- Phase II to Phase IV
- PK/PD end point
